Live Presentation

Features

- Present information to colleagues and clients around the world creating the ultimate DYNAMIC INTERACTION!
- Up to 6 presenters can interact with large audiences as long as they have high speed Internet connections
- Eliminate the need to spend time and money on travel for sales presentations, seminars and training
- Move back and forth between different media or use a whiteboard during your presentations

- Store your presentations in your virtual back office for future use

Customer Needs and Wants	Added Value
Need an easy and cost-effective way to present information to large groups	With Live Presentation, you can host a presentation for large audiences located anywhere in the world provided they have a high speed Internet connection
Need capability to move back and forth between different media during presentation	Able to switch between PowerPoint presentations, flash videos and a whiteboard to enhance your presentation
Would like to have other presenters join me	You can have up to 6 presenters appear live on screen. Each presenter can control the presentation from their computer.
Need to eliminate travel and room rental costs yet still attract participants from many different locations to my presentations	Attendees can participate in your presentation from their office or home without requiring any special software, just a high speed Internet connection and your invitation
Need a convenient way to notify individuals of presentation times	Live Presentation allows you to send email invitations to your contact list at the time you set up your presentation. Participants can then attend your presentation by clicking on the link provided by your email invitation
Want to be able to store my presentation for future reference	All presentations are maintained in your back office with a list of attendees and their email addresses
